### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- a. Claims 1 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hawkins et al. (U.S. Patent 5,133,076) in view of Kasuga U.S. Patent 5,721,930).

Regarding claims 1 and 6:

Hawkins discloses a method and system of operating a hand held computing device, the method comprising providing a hand held computing device with an electrical power conservation system (Col. 8, Lines 42-58), with an LCD display (Col. 4, Lines 30-48), with a touch sensitive screen and with a stylus for use in entering information into the computing device through the touch screen (Col. 4, Lines 30-68); taking at least one of the following set of actions: deactivating the touch screen ; and deactivating the LCD display (Col. 8, Lines 42-46, Col. 13, Lines 55-60).

Hawkins does not the stylus is positioned in a stylus receiving receptacle provided on the device; and when the stylus is positioned within the receptacle, Kasuga discloses stylus is positioned in a stylus receiving receptacle provided on

Art Unit: 2863

the device; and when the stylus is positioned within the receptacle (Col. 1-2, Lines 55-20, abstract), in order to properly restore data of the computer (Col. 2, Lines 10-21).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Hawkins to have the stylus is positioned in a stylus receiving receptacle provided on the device; and when the stylus is positioned within the receptacle taught by Kasuga ), in order to properly restore data of the computer (Col. 2, Lines 10-21).

***Allowable Subject Matter***

2. Claims 2, 3, 7, 8, 11 and 12 are allowed.

***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance:

Independent claims 11 and 12 contain allowable subject matter. None of the prior art of record shows or fairly suggests the claimed invention.

Regarding claims 11 and 12:

The primary reason for the allowance of claims 11 and 12 are the inclusion of the method and system of operating a handheld computing device including the use of comparing mass value associated with the receptacle when the stylus is positioned

Art Unit: 2863

within the receptacle. It is these features found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 2, 3 are allowed due to their dependency on claim 11.

Claims 7, 8 are allowed due to their dependency on claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

4. Applicant's arguments filed 7/17/2003 have been fully considered but they are not persuasive.

A. Applicant argues that the prior art does not show the activation/deactivation of the screen by sensing a stylus is positioned in the proper place, Hawkins and Kasuga talk about the activation/deactivation of the screen by sensing a stylus is positioned in the proper place (Hawkins Col. 4, Lines 49-67, Col. 8, Lines 42-46, Kasuga Col. 1-2, Lines 65-45, abstract).

Art Unit: 2863

Remind to the applicant that it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d-1647 (1987). This case Hawkins and Kasuga combination disclose the limitation of using an external apparatus to enable/disable the power function mode (Hawkins Col. 4, Lines 49-67, Col. 8, Lines 42-46, Kasuga Col. 1-2, Lines 65-45, abstract).

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
